The purpose of the Acoustical Society of America (ASA) is to generate, disseminate, and promote the knowledge and practical applications of acoustics. We are challenging ASA students to grab a camera, recruit friends, and create a 4-7 minute original video aimed at teaching the public about acoustics.

**Video Topic** – Answer a question about acoustics that many people might have. The Topic could be in your area of study or related to some aspect of popular culture. Some example questions:

• Is it possible to make a quiet supersonic aircraft?
• How can an object be “invisible” to sound?
• Can listening to the ocean tell us about climate change?
• Why do some auditoriums sound better than others?

**Prizes** –

• 1st place - $1000.00
• 2nd place - $750.00
• 3rd place - $500.00

**Judging** – A panel of ASA members and staff will judge entries according to their general accessibility, relevance to acoustics, accuracy, and quality.

**Rules** –

1. Any individual ASA student member or a team with at least one ASA student member may submit a video
2. One Video Submission per student or team
3. The video must be 4-7 minutes long
4. Deadline for submissions will be October 1st 2018

http://exploresound.org/student-video-challenge/

All winners will be announced during the 176th ASA Meeting in Victoria, Canada 5-9 November 2018.
